

## SPINDRIFT RACING

Based in the south of Brittany, the racing stable Spindrift racing was founded by Dona Bertarelli and Yann Guichard in 2011. Over the first five years Spindrift racing has grown and flourished, becoming a benchmark in international sailing. The team, who celebrated their fifth anniversary last year, has already proven highly successful in all types of regattas and oceanic record challenges. A number of these high level challenges have been met, a solid, talented technical and communication team is well established, working equally well on land and sea.

At the beginning there were just two boats: the D35 catamaran Ladycat, skippered by Dona Bertarelli and today the three-time winner of the Bol d'Or Mirabaud, and a 70-foot (21 metre) oceanic trimaran that won races across the Atlantic and in and around Europe.

Then, in 2013 Spindrift 2, the world's largest oceanic trimaran and an already legendary craft built to set crewed records, joined the fleet. Within a few months the Spindrift crew won the prestigious Rolex Fastnet Race onboard this giant of the ocean, and set their first oceanic record on the Route of Discovery.

Spindrift 2 was taken into the yard for Yann Guichard and the team to modify the 40-metre multihull to be suitable for solo racing in the 2014 Route du Rhum. The physical test for Guichard was colossal but he finished the race in second place, racing solo from Saint-Malo to Guadeloupe in only eight days.

The ensuing seasons are marked by participation in new and different circuits - but all in multihulls. Sailboat racing is beginning to change and boats are literally, starting to fly and Spindrift is involved in these innovative circuits from the outset, including the GC32 foiling catamaran in 2015. In that same year Spindrift won the Tour de France when it was raced in multihulls for the first time.

In 2016 Yann Guichard was the only French skipper to compete on the World Match Racing tour, but before this circuit starts, the team take on the biggest offshore challenge there is - round the world non-stop via the three great Capes - the ultimate record attempt for the Jules Verne Trophy. During the winter of 2015-16 Dona Bertarelli, Yann Guichard and their crew of 12 completed a remarkable, 40,000km round-the-world epic, from Ushant to Ushant on the tip of Brittany. It was to prove an incredible journey and an exceptional human adventure. They set the second fastest time for sailing around the world, and Dona Bertarelli became the fastest female sailor around the world.

The Jules Verne Trophy remains an abiding and engaging target, one that the team will once more challenge in the winter of 2017. [www.spindrift-racing.com](http://www.spindrift-racing.com)

INCREASED VISIBILITY - MARINEPOOL PREMIUM RANGE OF LIFEJACKETS

**BE SEEN,  
BE FOUND.**

## LUME-ON™

The groundbreaking Lume-On™ technology is illuminating the inflated air chamber in order to increase the visibility of the user.

The effect of the LED lights is increased through the neon-colored buoyancy chambers that catch the attention of potential rescue people. Lume-On™ is located on the bottom of the chamber and is activated as soon as there is water contact. Once activated, the lights will be blinking intensively up to eight hours.

This new developed lifejacket sets new milestones in terms of safety.

Possible rescue vests with Lume-On™: Aero Plus, Premium 180 and 300N and ISO Pro 180N and 300N.

NORD  
STREAM  
RACE

## NORD STREAM RACE

*750 nautical miles*  
*70 sailors*  
*5 participating nations*

The Saint Petersburg Yacht Club, assisted by the Norddeutscher Regatta Verein and other top sailing clubs in the Baltic Sea is organising the Nord Stream Race.

The route 2017 of this challenging offshore regatta will follow the Nord Stream pipeline,

leading the participants from Germany via Denmark, Sweden, Finland to the final in Saint Petersburg.

Taking on the challenge to sail the approximately 750 nautical miles across the whole of the Baltic Sea with all its demanding weather conditions are five brave teams on board of elegant and fast Swan yachts. They have been invited by Saint Petersburg Yacht Club, owner

of the Swan fleet, to increase friendship between nations. The teams consist of a mixture of young talented sailors and experienced offshore professionals, representing some outstanding sailing clubs from different nations. In order to encourage young talents.

The Baltic is renown for its unpredictable and sometimes harsh conditions at this time of the year.

Marinepool is the official clothing partner of the event and Marinepool performance ocean sailing clothing will keep the crews on the fleet of Swan60s dry, warm and comfortable, enabling them to focus on their competition and the fight with the elements even when the going gets tough.

## FABRICE AMÉDÉO - IMOCA NEWREST/MATMUT

Fabrice Amédéo, both journalist and passionate sailor, has chosen to give up his office job to live his dream: to sail the great ocean races and to sail solo and non-stop around the world.

With his skills and experience in off-shore racing, he is an allrounder, equally at ease among crews or sailing single handed. He has 7 trans-Atlantic races under his belt and was competing in the double handed Transat Jacques Vabre

with Eric Peron, when this catalogue went into print.

In 2016 Fabrice will take on his greatest challenge so far, The Vendée Globe, sailing's Everest. The Vendée is arguably the toughest sailing race in the world and in theory an utterly simple affair. A regatta around the world, for singlehanded sailors, without any stopover. France to France, leave Antarctica to Starboard. That's it. In theory at least, because

beyond this, the Vendée Globe is the stuff of legends.

Marinepool is proud to partner up with Fabrice Amédéo in this great human and sporting adventure and provide him with the latest generation of ocean racing clothing made for the most extreme conditions, keeping the sailor warm and dry for a balanced body climate so all his focus can be directed on performance.

## HOBART III Jacket

Art.-No. 1003050 **XS - XXXL**

**FABRIC** Outshell/Coating:100% polyamid/100% polyurethane Lining:100% polyamid

**FEATURES** Much more than a facelift! Hobart 3 jacket is the successful evolution of the classic Hobart jacket. Next to the material and colour mix, there is a new offshore collar, the brandnew wp pocket system and the 2in1 inzip option, which advance the Hobart 3 jacket to the next level. The wp pocket system allows to mount a separate waterproof pocket into the jacket's right outer pocket. Proven 2-layer Nylon fabrics with MPU coating provides high durability, waterproofness and breathability. Fully taped seams and waterproof. Other features: Double cuffs, double placket. High fleece lined collar with spray protector and signal hood stored inside. Chest pocket, outer pockets with top and side entry and fleece lining. Mesh/taffeta lining with an inner pocket. 3M<sup>®</sup> reflective at shoulder and hood plus other reflective details. A new standard and great value!

## COMPETENCE IN SAFETY

Marinepool – Europe's leading manufacture of life jackets in the sports and leisure industry – has dozens of cooperations with rescue organizations and special forces trained in search and rescue operations around the globe. People who risk their own life in order to save other's life trust in Marinepool life jackets.

Life belts and accessories when their safety is at stake wear high tech protective clothing by Marinepool equipped with additional safety features like highly visible reflective bands by 3M™ and various pockets for VHF and other electronic devices.

# MARINEPOOL FOUNDATION

The Marinepool Foundation was established in 2013 based on its partnership with the "DLRG – Foundation for water safety".

Its goal is to finance costs for fighting death by drowning and in order to do so it cooperates with the DLRG e.V.

The foundation pursues only and exclusively charitable aims and one major goal is the prevention of drowning by education, information and clarification. Furthermore it supports structures of civil engagement for the purpose and the qualification of emergency units as their professional equipment. Other responsibilities are the organization and provision of water emergency services, the participation of emergency response and disaster protection.

If you want to support the Marinepool Foundation please contact us:

## OMAN SAIL

Oman Sail is a national initiative established in 2008 that uses the power of sport to contribute to the development of the Omani people. Oman Sail is one of the strongest growing brands in the sailing world. The initiative aims for promoting Oman as a luxury travel and investment destination but also for enhancing the development of the professional sailing sport in the Oman.

It encompasses a national sailing squad and high achieving inshore and offshore racing teams, all of which benefit from world-class coaching and whose ultimate objective is to win an Olympic medal for Oman. The programme has pledged to teach 70,000 Omani children to sail by 2020 at eight sailing schools, four of which are already operational. The goal is to rekindle Oman's maritime heritage while raising the country's regional and international

profile as a high-end tourist and foreign investment destination, through competitive sailing at home and abroad. Oman Sail seeks to instil confidence and to teach valuable, transferable life skills to a generation of Omanis.

The Omani sailing programme is highly successful, Omani teams have won the the Extreme Sailing Series™ three times with a fourth time likely in 2015. They are at the forefront of foiling and won the Bullitt GC32 Racing Tour in spectacular fashion ahead of rivals Alinghi and Spindrift racing. The initiative "Oman Sail" organizes the only offshore sailing event in Arabic waters "EFG Sailing Arabia - The Tour" and one of the largest regattas for Olympic and international dinghy classes with "Mussanah-Race Week", a high-class training camp and competition for ambitious young

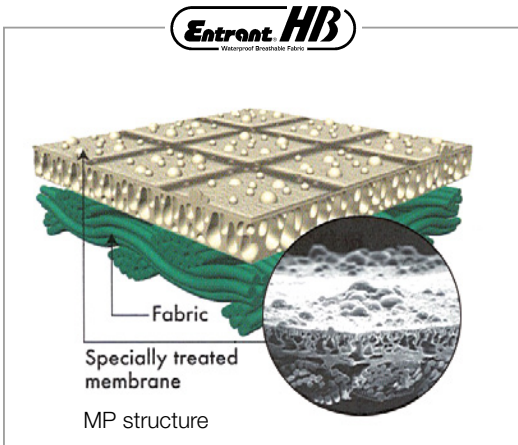

talents that brings together the next generation with high-class sailors and professionals from all over the world.

Oman Sail's flagship, the MOD70 trimaran Musandam, sailed to a World Record around Britain and Ireland in 2014 and Round Ireland in 2015 with skipper Sidney Gavignet.

The partnership with Oman Sail goes back to 2011. Marinepool is the official clothing supplier to the Oman Sail organization and thus of the mentioned Oman Sail events and all Oman Sail racing teams, from olympic and dinghy classes to the leading Extreme Sailing Series™ catamaran "The Wave, Muscat", EFG Sailing Arabia - The Tour, Oman Sail M34 and last but not least the impressive MOD70 Oman Air - Musandam.

## DAMIEN SEGUIN (FR)

Damien Seguin is now an Olympic legend. The French skipper has won the Gold in the Rio 2016 Paralympic Games and he had already done so in 2004 in Athens and won silver in Pekin in 2008.

Always up for new challenges, he is now aiming at the solo round the world race Vendée Globe 2020.

He is determined to show everyone that a small "difference" is not an obstacle to great performances.

The sailor is enthusiastic about all projects as soon as they are related to sailing and high level competition with valid and/ or handicapped athletes.

For this reason, he will participate in 2017 to the Tour de France à la Voile that gathers the best sailors in France with only one objective: the victory!

[damienseguin.com](http://damienseguin.com)

### TECHINFO TEMPERATURE CONTROL SYSTEM (TCS):

**basic layer:** the basic layer (e.g. efficiency underwear) is worn directly on the skin and is most often made from non-absorbing synthetic fibre to insulate and transport the vapour away from the skin. never use cotton underwear as it will absorb the sweat causing a chilly and damp feeling.

**insulating layer:** the insulating layer is the middle or 2nd layer, you can choose from a wide range of garments or fibres. nowadays mostly synthetic fibres like polyester or natural fibres like Merino wool are being used as they insulate even when wet.

**outer layer:** this layer has three main tasks: 1. protect the middle layer from humidity (waterproof), 2. transport the humidity away from the mid layer (breathable), 3. stop the wind to prevent temperature loss (windbreaker)

# LifeShirt®

By MARINEPOOL

LifeShirt® is an auto-inflating personal flotation device that uses today's most advanced marine grade materials and technologies, applied to a full range of sports apparel for in and around the water.

The LifeShirt product line offers a worry-free safety solution for all water enthusiasts - from children, to teens, to pros who make a living around marine environments.

LifeShirt is built for adventure and is certified for both children and adults as an ISO 12402-5 Level 50 buoyancy aid.

be safe.®

FEATURES ON ALL MODELS:

- Moisture-wicking internal liner with antibacterial and Channel Flow® cooling technologies
- Machine washable on gentle cycle, hang to dry
- Includes two inflation cylinders and travel case
- Can be orally inflated without using a cylinder
- UPF 50+ sun protection

**STRONGHOLD®**

Art.-No. LS 5003304 / SS 5003305 **S - XXL**

**FEATURES** Stronghold® is a Level 50 compression-fit buoyancy aid that provides instant flotation with the pull of a handle. The form fit design enhances athletic performance while providing added safety in and around the water. Provides 50N+ of buoyancy when inflated, offered in both automatic models and manual-only models. Short sleeve and long sleeve models available, breathable side mesh panels vent body heat.

**SPECIALS** CE ISO 12402-5 50N / UPF 50+ sun protection  
**COLOUR** black

**WATCHDOG®**

Art.-No. 5003306 **SM - LG**

**FEATURES** Watchdog® is a Level 50 lightweight inflatable buoyancy aid specifically designed for children. The device provides instant flotation when a child's shoulders submerge below the water. Intended for children ages 5 to 12 (25kg and up) easy on and off with full front zipper, adjustable waistband secures device to the child's body. Crotch strap standard on size SM, manual-only inflation model available for size M and LG, removable long sleeves

**SPECIALS** CE ISO 12402-5 50N  
**COLOUR** blue/green

**SAFEGUARD®**

Art.-No. 5003307 **S - XXL**

**FEATURES** Safeguard® is a Level 50 loose-fitting inflatable buoyancy aid providing over 70N of buoyant force. The comfortable and relaxed fit is perfect for recreational boating, fishing, paddlesports or just a day at the beach. Rated for whitewater, provides 70N+ of buoyancy when inflated, offered in both automatic models and manual-only models. Removable long sleeves, mesh side pockets, hidden internal waist band, utility loop

**SPECIALS** CE ISO 12402-5 50N  
 UPF 50+ sun protection  
**COLOUR** white (w/o picture)

## SUP DRY SUIT

Art.-No. 5002934 **XXS - XXL**

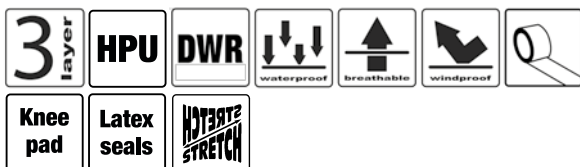

**FABRIC** Outshell/membrane/backing:100%polyamid/ 100% polyurethane/100% polyamid

**FEATURES** Stand-Up-Paddling, Dinghy, Kite, Surf – with the new SUP Drysuit the season never ends! Lighter and softer than classic drysuits, but still tough! Totally waterproof with a waterproof T-zip to enter, fully taped seams, latex seals at sleeve/leg and a soft neoprene seal at neck. The 3+1 layer Nylon fabric with microporous XPU membrane and additional coating is totally waterproof but still breathable. The knee and seat come with a flexible reinforcement. Fit is wide enough to allow freedom of movement and wearing insulation underwear. There are width adjuster at sleeves, legs and waist. Keypocket inside. This suit will not only catch eye but change your view on watersport season!

**SPECIALS** WP 20.000mm, MVP 10.000gr/sqm/24h

**COLOUR** red/grey/blue | red/grey/frog green

Weight 2.00kg

## SUP LIGHT DRY SUIT

Art.-No. 5003218 **XS - XXL**

**FABRIC** Outshell: 94% polyamid/6% elastane membrane: 100% polyurethane

**FEATURES** Very light (1kg!), very breathable semi-drysuit, designed especially for SUP. Protects against spray and wind chill, allows any action. The hightech 3L fabric with HPU membrane is perfect for active use: light, stretchy, waterproof, very breathable (RET12) and yet durable. The drysuit features a soft neoprene collar, soft neoprene cuffs and latex seals at legs, waterproof front zip, width adjuster for leg, sleeves and waist, soft reinforcement at knees, keypocket inside. The drysuit is fully taped and waterproof – only the neoprene collar construction is not 100% watertight for the benefit of comfort. So we call it semi-drysuit. Ergonomic unisex fit with raglan sleeves. Combine best with 1000095 Efficiency Underwear or 1003221 Action PP Longsleeve.

**SPECIALS** WP 20.000mm, MVP 20.000gr/sqm/24h (RET12)

**COLOUR** blue/red

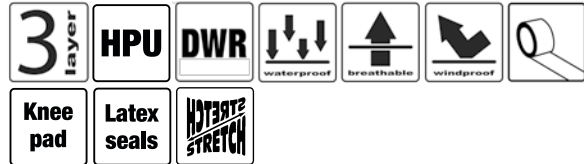

Weight 1.00kg

## DEUTSCHE SEGEL-BUNDESLIGA – THE GERMAN NATIONAL SAILING LEAGUE

In 2013 Marinepool partner Konzeptwerk introduced a new innovative concept to sailing in Germany: Deutsche Segel-Bundesliga – a national sailing league for yacht clubs. An idea so simple and brilliant that in hindsight it is hard to imagine it has not already been there. And an idea so successful that it has since been adopted by other nations, resulting in 14 national leagues in Europe and the USA with a SAILING Champions League event crowning the international top club.

Deutsche Segel-Bundesliga is the official German yacht club championship, sanctioned by the German Sailing Federation for the national title. The format resembles other sports championships. The best 36 yacht clubs of the country (selected through qualifiers and the previous season's results) sail against each other in several events around the country and in two separate leagues of 18 clubs. Races

are sailed in groups of 6 on one design yachts provided by the league in up to 45 races per weekend. The top clubs of the second league qualify for the 1st league the following year, new entries into the second league are determined in a qualifying regatta open to all clubs of the country.

A consistent performance all over the season is the secret to success in order to top the scores at the end of the season as no discard is allowed. The first two seasons of 2013 and 2014 were dominated by Norddeutscher Regatta Verein (NRV) but in 2015 and 2016 the young Marinepool sponsored crew of the Deutscher Touring Yacht-Club, runner up in 2014, won the Championship in style.

Marinepool is on board of Segel-Bundesliga as the „Official Clothing Supplier“ of the championships and with team kit for the organisers and on the majority of the competing yacht club teams.

All races of Deutsche Segel-Bundesliga are streamed live over the event website. Expert commentators give inside information, in addition to the live stream spectators and viewers at home are offered GPS tracking and can analyse the races after the race day. Selected events will have the full SAP Sail Cube experience with public viewing, TV studio and on site broadcast.

Marinepool is very proud of all the teams in the German “Bundesliga” with excellent results in 2016. The DTYC (Deutscher Touring Yacht-Club) is double crowned champion by winning the “Bundesliga” in Hamburg as well as the Champions League.

As a cooperation partner, we are looking forward to season 2017 with the German National Sailing League!
