

WOMEN'S SS20 COLLECTION EU EDITION

SOLE SPRING

Our new tri-density comfort technology with memory foam. Combining maximum comfort, shock absorption and spring in every step.

1. Heel pad incorporating memory foam.

2. EVA foam heel cup footbed, providing shock absorption and heel support.

3. Cushioned EVA foam outsole insert, providing underfoot comfort and flexibility in the forepart.

Providing long-lasting comfort and performance, from the first step to the last wear.

Combining high performance, long lasting, flexible and lightweight material with leading-edge technologies to ensure superior comfort and performance.

Featuring open-cell, breathable material which helps you stay cool and dry while maintaining performance throughout the life of your product.

Materials are free of latex, PVC's and additional solvents that can cause skin irritations.

Will never break down unlike many other "comfort" products which collapse with wear and time.

Acting like tiny springs in your shoes, continuing to bounce back after each step (hit/impact/etc) to withstand even the toughest daily wear.

Materials maintain their size, shape and fit throughout the lifetime of the shoe.
