The characteristics of the hardware make it compatible with all currently existing protocols, its integrated 16-pole CPC connector, allows the use of all diagnostic cables. It is compatible with AXONE and PC. Thanks to Bluetooth technology, the technician can make a comfortable diagnosis without wires, even from the jetty.
Extremely powerful, they allow the mechanic to easily manage the map files. The CAN standards supported include the possibility of CAN single wire management and a further CAN controller for the diagnosis of more networks.
It allows the recording of the diagnosis session in "dynamic tests" mode, that is to say with the boat in motion, to locate specific faults that could not be verified in the mooring.

Las características del hardware lo compatibilizan con todos los protocolos actualmente existentes, su conector CPC de 16 polos integrados, permite el uso de todos los cables de diagnosis. Es compatible con AXONE y PC. Gracias a la tecnología Bluetooth el técnico podrá realizar una cómoda diagnosis sin cables de por medio, incluso desde el pantalán.
Extremadamente potente, permite al mecánico una gestión fácil de los archivos de mapa. Los estándares CAN soportados incluyen la posibilidad de gestión CAN single wire y un CAN controller más para la diagnosis sobre más redes.
Permite la grabación de la sesión de diagnosis en modalidad "pruebas dinámicas", es decir con la embarcación en movimiento, para localizar averías específicas que no se podrían verificar en el amarre.

Le caratteristiche hardware lo rendono compatibile con tutti i protocolli attualmente esistenti, il suo connettore CPC 16 poli integrato consente l'utilizzo di tutti i cavi diagnostici. E' compatibile con AXONE e PC. Grazie alla tecnologia Bluetooth il tecnico potrà realizzare una diagnosi senza cavi in mezzo, anche dal molo.
Estremamente potente, permette al meccanico una gestione facile degli archivi della mappa. Gli standard CAN supportati offrono la possibilità di gestire: CAN single wire e un altro CAN controller per eseguire le diagnosi su più reti.
Permette la registrazione di una sessione di diagnosi in modalità "prova dinamica", ovvero con l'imbarcazione in movimiento, per constatare avarie specifiche che non si possono verificare in officina.

Les caractéristiques du matériel le rendent compatible avec tous les protocoles existants, son connecteur CPC 16 pôles intégré permet l'utilisation de tous les câbles de diagnostic.Il est compatible avec Axone et Pc. Grâce à la technologie Bluetooth, le technicien peut effectuer un diagnostic sans fil, même depuis le quai. Extrêmement puissant, il permet au mécanicien de gérer facilement les fichiers des cartes. Les normes CAN prises en charge incluent la possibilité d'une gestion CAN à fil unique et un autre contrôleur CAN pour le diagnostic en réseaux. Il permet l'enregistrement de la séance de diagnostic en mode «test dynamique» c'est à dire avec le bateau en mouvement pour localiser des défauts spécifiques non vérifiables en atelier.

PISTON DESIGNS | DISEÑOS DE PISTONES | DISEGNO DEI PISTONI | DESSIN DES PISTONS

There are three basic piston designs used in Johnson / Evinrude outboard engines: Crossflow, Loopcharged and Four-Stroke.

Existen tres tipos de diseño diferentes utilizados en los motores Johnson-Evinrude: Crossflow, Loopcharged y 4 Tiempos.

CROSSFLOW

As the air / fuel mixture travels through the transfer port and into the cylinder, a deflector, cast into the top of the piston, directs the air / fuel mixture towards the combustion chamber.

Mientras la mezcla de aire y combustible circula a través del cilindro, un deflector dirige la mezcla hacia la cámara de combustión.

Mentre la miscela d'aria e il combustibile circolano attraverso il cilindro il deflettore del pistone dirige la miscela verso la camera di combustione.

Lorsque le mélange air-carburant circule dans le cylindre, un déflecteur dirige le mélange dans la chambre de combustion.

LOOPCHARGED

A loopcharged engine has a transfer port cast into the cylinder wall in such a way that it will direct the air / fuel mixture towards the combustion chamber and spark plug tip without the need for a piston deflector.

El motor loopcharged tiene una toma de transferencia en la pared del cilindro, de tal forma que dirije la mezcla de aire y combustible hacia la cámara de combustión, arrancando así, sin la necesitadad de un deflector.

Aspirazione nella parete del cilindro in maniera tale da dirigere la miscela d'aria e combustibile verso la camera di combustione, non avendo così la necessità di convogliare la combusitone con il deflettore.

Le moteur Loopcharged a un orifice de transfert dans la paroi du cylindre, de telle sorte qu'il dirige le mélange d'air et de carburant vers la chambre de combustion, démarrant ainsi, sans avoir besoin d'un déflecteur.

Four-stroke / four-cycle engines are fairly new to the marine industry. They have become the engine design preferred by most marine engine manufacturers to meet government mandated exhaust emission standards. Oil stored in the crankcase of these engines is splashed onto the cylinder walls for piston and ring lubrication.

Los motores de 4 tiempos son bastante nuevos en la industria náutica. Son los favoritos de la mayoría de los fabricantes pues respetan las leyes sobre el medio ambiente. El aceite almacenado en el cárter de estos motores sale disparado hacia las paredes de los pistones y sus aros para su lubricación.
